POSTGRADUATE MEDICAL JOURNAL

VOLUME 63

January to December 1987

Published for
The Fellowship of Postgraduate Medicine
by The Macmillan Press Ltd

Subject Index

*denotes case report

Abdominal
* aortic aneurysm, ruptured, in Marfan's syndrome *August*, **685**
tuberculosis, abdominal, East Birmingham, 16 year study. *July*, **539**
wall fat biopsy, in diagnosis of amyloid (AL), in an octogenarian: diagnostic techniques. *February*, **105**
Abstracts, European Medical Research Group, meetings, 11 December 1986. *May*, **411**: 27 January 1987. *June*, **507**
Accidents among elderly shoppers: correspondence. *November*, **1008**
Acetazolamide
and almitrine, effects on ventilation (abstract). *March*, **191**
effect on blood gases and 2,3DPG during ascent and acclimatization to high altitude. *March*, **183**
effect on breath holding at high altitude. *March*, **189**
effects on cerebral blood flow and brain tissue oxygenation. *March*, **185**
effect on changes in body weight, fat and muscle mass at high altitude (abstract). *March*, **192**
temazepam, effects on sleep at high altitude (abstract). *March*, **191**
Acetylcholine, an *in vitro* animal model for studying synaptic transmission mediated by (abstract). *May*, **411**
Acquired immunodeficiency syndrome *see* AIDS
Acromegaly, bromocriptine test. *April*, **241**
dynamic tests of growth hormone responses. *April*, **241**
Acute
* abdomen, haemorrhage into urachal cyst, presenting as. *June*, **493**
management, following high-dose cytosine arabinoside: correspondence. *May*, **413**
inflammatory demyelinating polyradiculopathy *see* Guillain-Barré syndrome
* renal failure, disseminated mucormycosis presenting with. *April*, **297**
* following *Yersinia pseudotuberculosis* septicaemia. *September*, **815**
Acyclovir treatment of herpes simplex encephalitis, experience in district hospital. *December*, **1037**
Addisonian crisis, missed, surgical wards: missed diagnosis. *May*, **367**
*Adrenal and islet cell hyperplasia associated with malakoplakia. *June*, **497**
Age and hepatitis A virus infection (abstract). *October*, **918**
AIDS
HIV infection, and the general physician: leading article. *June*, **427**
* hypersensitivity reactions to drugs. *January*, **55**
* and macro-amylasaemia. *August*, **677**
-related pneumocystis, Fansidar, treatment for?: correspondence. *June*, **509**
* without recognized risk factors. *October*, **877**
Alcoholic(s)
* hypomagnesaemia causing myopathy and hypocalcaemia. *August*, **665**
population, autonomic neuropathy in. *December*, **1033**
* stupor, insulinoma presenting as. *January*, **39**
* pancytopenia and folate deficiency in. *February*, **117**
Alcoholism, effects on brain size: leading article. *April*, **233**
Almitrine and acetazolamide, effects on ventilation (abstract). *March*, **191**
*Alpha-1 antitrypsin deficiency, and pregnancy. *September*, **817**
Altitude, high
blood lactate changes during exercise. *March*, **177**
changes in body weight, fat and muscle mass, and effect of acetazolamide (abstract). *March*, **192**
changes in serum and urinary purines (abstract). *March*, **193**
effect of acetazolamide on blood gases and 2,3 diphosphoglycerate during ascent and acclimatization. *March*, **183**
effect of acetazolamide on breath holding. *March*, **189**
effect of carbonic anhydrase on exercise (abstract). *March*, **193**
and intestinal absorption. *March*, **173**
and proteinuria, origin. *March*, **179**
and sleep, effects of acetazolamide and temazepam (abstract). *March*, **191**
Amantidine in neuroleptic malignant syndrome: correspondence. *June*, **508**
*Amiodarone-induced pulmonary toxicity mimicking metastatic lung disease. *May*, **393**
*Amoebic peritonitis in pregnancy, United Kingdom. *June*, **495**
Amyloid
* diagnosed by abdominal wall fat biopsy, in an octogenarian: diagnostic techniques. *February*, **105**
* disease, surgical complications. *April*, **281**
* myopathy and myeloma, response to treatment. *February*, **141**
*Amyloidosis
in continuous ambulatory peritoneal dialysis. *August*, **693**
systemic, impaired splenic function. *May*, **357**
Anal burning and peppermint oil: correspondence. *August*, **717**
*Angiitis, isolated, of brain, in young female on contraceptive pill. *December*, **1085**
Angiodysplasia
* gastric, missed cause of gastrointestinal bleeding. *October*, **865**
* of small bowel, 'brilliant' technique for localizing the quiescent lesion. *November*, **995**
*Angiotensin converting enzyme inhibitors, consequences of fluid loss. *May*, **385**
Angiotensin II, low dose, potently antinatriuretic with evidence of proximal tubular action in man (abstract). *October*, **917**

*Antenatal appendicular perforation. *November*, **1001**
Aortic aneurysm, leaking: diagnostic images. *February*, **107**
*Aortography, high translumbar, and chylothorax. *January*, **37**
*Appendicular perforation, antenatal. *November*, **1001**
Appendix, tuberculosis of, report of 17 cases and suggested aetiopathological classification. *October*, **855**
Arterial pulsation, real time ultrasound, and neonatal cerebral infarction: neonatal medicine. *April*, **263**
Ascites, ruptured, 'accidental' massive paracentesis without complication: correspondence. *November*, **1007**
*Aspergillomata, and cavitating lung lesions with pulmonary berylliosis being treated with corticosteroids. *September*, **797**
Asthmatic patients, cumulative dose comparison between salbutamol and fencterol metered dose aerosols. *June*, **459**
Atrial
* fibrillation, transient, precipitated by hypoglycaemia: two case reports. *October*, **895**
* flutter/fibrillation and ventricular tachycardia combined, successful termination by intravenous sotalol. *July*, **579**
natriuretic peptides, clues to physiological and clinical importance: leading article. *January*, **1**
Autonomic neuropathy in alcoholic population. *November*, **1033**

Bacterial endocarditis, and teicoplanin. *August*, **621**
Ballism,bilateral, induced by ibuprofen in schizophrenia: correspondence. *July*, **593**
*Benylin dependence, metabolic acidosis and hyperglycaemia. *July*, **587**
*Berylliosis, pulmonary, on corticosteroid therapy, with cavitating lung lesions and aspergillomata. *September*, **797**
*Biliary fistula, post-traumatic, late, and ERCP. *February*, **147**
Birmingham Medical Research Expeditionary Society (BMRES) 1984 Medical Research Expedition to the Himalayas. *March*, **165**
Blackpool, Crohn's disease, late onset: disease in the elderly. *June*, **471**
*Bleeding, prolonged post-operative, due to acquired von Willebrand syndrome. *October*, **901**
Blood gases, effect of acetazolamide during ascent and acclimatization to high altitude. *March*, **183**
*Blunt abdominal trauma, colonic stricture secondary to, report of case and review of aetiology. *October*, **911**
Body weight, changes at high altitude, and effect of acetazolamide (abstract). *March*, **192**
*Bone marrow granulomas in mononucleosis. *April*, **277**
*Bouveret syndrome, causing gastric outlet obstruction. *October*, **909**
Brain
* abscess, complicated by intraventricular haemorrhage. *September*, **785**
* isolated angiitis, possibly caused by contraceptive pill. *December*, **1085**
size, effects of alcoholism: leading article. *April*, **233**
tissue oxygenation, effects of acetazolamide. *March*, **185**
Breast
lesions, non-palpable, out-patient needle localization and biopsy. *January*, **17**
pain clinic, rational approach to classification and treatment of breast pain: hospital practice. *July*, **547**
Breath holding, at high altitude, effect of acetazolamide. *March*, **189**
Breathlessness, mechanisms. *August*, **637**
Bromocriptine test, acromegaly. *April*, **241**
*Bronchial carcinoma, lymphomatoid granulomatosis mimicking. *May*, **381**
see also lung disease, metastatic
*Bronchobiliary fistula due to acute cholecystitis in suprahepatic gall bladder. *April*, **291**
Bronchoscopy, role in haemoptysis with normal chest X-ray. *November*, **947**
Bursitis, prepatellar, infective, management and outcome. *October*, **851**

Calcitonin, and calcium responses to calcium infusion in type I diabetes mellitus. *April*, **249**
release, calcium stimulated, no effect of verapamil. *January*, **23**
Calcium
* and calcitonin responses to calcium infusion in type I diabetes mellitus. *April*, **249**
* channel blockers, failure to prevent pure vasospastic myocardial infarction. *January*, **41**
stimulated calcitonin release, no effect of verapamil. *January*, **23**
Calf swelling, unusual causes, 1. Unusual presentation of tibial artery false aneurysm. *August*, **649**: 2. Rhabdomyolysis mimicking deep vein thrombosis. *August*, **653**: 3. Popliteal vein obstruction by osteochondroma of proximal tibia. *August*, **657**
Campylobacter-like organisms, gastric, and gastritis, in patients without peptic ulcer. *July*, **543**
Campylobacter pyloridis, new organism to explain an old problem: review article. *July*, **533**
Canada, postgraduate training. *August*, **707**
Cancer chemotherapy, agent-induced perivenous extravasation injuries: review article. *January*, **5**
Candida albicans* vertebral osteomyelitis, in chronic renal failure. *August*, **695
*Candidal endophthalmitis, manifestation of systemic candidiasis. *July*, **563**
Cannabis smoking, heavy, stroke after: correspondence. *June*, **511**
*Captopril, Guillain-Barré neuropathy during treatment with. *March*, **221**
Carbimazole treatment, thyroid stimulation levels by TSH (IRMA) to predict relapse of thyrotoxicosis. *September*, **755**

Carbonic anhydrase inhibitors, effect on exercise at high altitude (abstract). *March*, **193**
*Carcinoid tumour metastasizing to cerebellum, co-secretion of calcitonin gene-related peptide, gastrin-releasing peptide and ACTH by. *February*, **123**
Carcinoma
* of duodenum, management. *October*, **907**
* intranasal, in renal transplant recipient on long term immunosuppression. *November*, **989**
*Cardiac
bypass surgery, with haemorrhagic endocrine sequelae. *June*, **489**
failure, congestive, advances: conference report. *August*, **713**
severe reversible, associated with methanol intoxication. *October*, **867**
tamponade due to haemorrhagic pericardial effusion, systemic lupus erythematosus presenting with. *July*, **567**
Careers advice and counselling in medicine: scenes from postgraduate life. *May*, **409**
Catecholamine secreting tumours, extra-adrenal location, by selective venous sampling and nuclear magnetic resonance scanning. *June*, **451**
Central somatosensory pathways, human, gating (abstract). *June*, **507**
Centres for education: correspondence. *March*, **223**
Cereal toxicity in coeliac disease, investigation: mechanisms of disease. *September*, **767**
*Cerebellar syndrome in sarcoidosis. *December*, **1083**
Cerebral
blood flow, effects of acetazolamide. *March*, **185**
infarction, neonatal, real time ultrasound and arterial pulsation: neonatal medicine. *April*, **263**
* lymphoma, primary, and systemic lupus erythematosus. *July*, **569**
Cerebrospinal fluid studies, clinical use in demyelinating neurological diseases: review article. *September*, **735**
Chemotherapy
cancer, agent-induced perivenous extravasation injuries: review article. *January*, **5**
conventional, failure in aggressive lymphomas. *January*, **11**
*Cholangiocarcinoma associated with oral contraceptives, regional lipiodolized chemotherapy for. *July*, **583**
*Cholestasis, intrahepatic, benign recurrent, 25 years follow up. *April*, **295**
*Choreoathetosis, paroxysmal kinesigenic, in hyperthyroidism. *December*, **1089**
*Chronic
lymphocytic leukaemia, primary malignant neoplasms associated with. *April*, **253**
* renal failure, *Candida albicans* vertebral osteomyelitis in. *August*, **695**
* and tuberous sclerosis, rare association. *September*, **811**
*Chylothorax, after high translumbar aortography. *January*, **37**
Cirrhotics after repeated doses of desmopressin acetate (DDAVP), improved haemostasis (abstract). *October*, **918**
Clinical Research Meetings, San Diego, May 1987: conference report. *November*, **1005**
Clinical trials in senile dementia – I, critical review: review article. *April*, **237**; II. *May*, **337**
Clomiphene citrate, in Tourette's syndrome: correspondence. *June*, **510**
Clonazepam-induced Tourette syndrome in hyperexplexia: correspondence. *April*, **311**
Clostridium difficile
* colitis, following treatment with metronidazole and vancomycin. *November*, **993**
sulphasalazine, and ulcerative colitis. *November*, **955**
Coagulation abnormalities and eosinophilia. *November*, **943**
Coeliac disease, investigation of cereal toxicity: mechanisms of disease. *September*, **767**
*Colobomata associated with Noonan's syndrome. *July*, **559**
Colon
* carcinoma presenting with dyspepsia. *March*, **215**
* stricture secondary to blunt abdominal trauma, report of case and review of aetiology. *October*, **911**
* tuberculosis, isolated; two cases. *May*, **403**
Colony-stimulating factors in pathogenesis and treatment of disease. *December*, **1061**
*Condom ileus, result of practical joke. *June*, **501**
Continuous ambulatory peritoneal dialysis
* amyloidosis in. *August*, **693**
Trichosporon cutaneum complicating: correspondence. *November*, **1008**
*Contraceptive pill, possibly causing isolated angiitis of the brain. *December*, **1085**
*Convulsions, nocturnal, and insulin-induced hypoglycaemia, in diabetes. *August*, **673**
*Copper deficiency, in late onset hypogammaglobulinaemia causing macrocytic anaemia. *March*, **205**
Corticosteroid, alternate day, causes alternate day hyperglycaemia. *September*, **761**
Counselling and careers advice in medicine: scenes from postgraduate life. *May*, **409**
*Cretinism and lingual thyroid presenting in an adult. *October*, **881**
Crohn's disease
* cricopharyngeal. *December*, **1101**
late onset, Blackpool: disease in the elderly. *June*, **471**
and sarcoidosis: correspondence. *June*, **509**
*Cryptococcal choroidoretinitis and immunodeficiency. *November*, **969**
*Cryptosporidiosis, toxic megacolon in. *December*, **1103**
Cushing's syndrome
* carcinoid tumour presenting as. *February*, **123**
* ectopic, with periodic hormonogenesis, case suggesting a pathogenetic mechanism. *October*, **887**
Cyanotic tetralogy of Fallot, in 77 year old man: disease in the elderly. *May*, **361**
*Cyclophosphamide, low-dose, and irradiation in Graves' ophthalmopathy. *September*, **777**
Cyclosporin A in steroid-sensitive nephrotic syndrome with frequent relapses. *September*, **757**
Cysts, diverse benign: diagnostic images. *March*, **195**
Cytosine arabinoside, high-dose, management of acute abdomen following: correspondence. *May*, **413**

Decision analysis in clinical practice: editorial. *September*, **729**
Deep vein thrombosis, rhabdomyolysis mimicking. *August*, **653**
Dementia
investigation decisions. *November*, **963**
multi-infarct, effects of naloxone on learning and memory: correspondence. *August*, **716**
Demyelinating neurological diseases, use of cerebrospinal fluid studies: review article. *September*, **735**
*Dermoid cyst of greater omentum, lumbosacral plexopathy due to. *January*, **45**
Designated trainers, general practice. *August*, **711**
Desmopressin acetate (DDAVP), improved haemostasis in cirrhotics after repeated doses (abstract). *October*, **918**
*Diabetes insipidus, post-traumatic, combined with primary polydipsia. *January*, **33**
mellitus maturity onset, use of insulin. *October*, **859**
* nocturnal convulsions and insulin-induced hypoglycaemia in. *August*, **673**
type I, calcium and calcitonin responses to calcium infusion. *April*, **249**
Diagnosis and decisions in clinical practice: editorial. *September*, **729**
DIDMOAD syndrome in Chinese male with HLA DR7 DRw12: correspondence. *December*, **1109**
Diet in progressive renal failure: review article. *August*, **611**
2,3 Diphosphoglycerate, effect of acetazolamide during ascent and acclimatization to high altitude. *March*, **183**
Disseminated
intravascular coagulation caused by the insecticide Propoxur: correspondence. *April*, **311**
* ulcerative colitis complicated by. *August*, **689**
* mucormycosis, presenting with acute renal failure. *April*, **297**
Diuretics, and idiopathic oedema. *January*, **25**
Diverse benign cysts: diagnostic images. *March*, **195**
Doctor/patient relationship, and technology: scenes from postgraduate life. *July*, **591**
*Dyspepsia, colon carcinoma presenting with. *March*, **215**
Dystrophia myotonica and pregnancy, instructive case: missed diagnosis. *July*, **555**

*Ectopic Cushing's syndrome with periodic hormonogenesis, case suggesting a pathogenetic mechanism. *October*, **887**
Education, medical, 2000: scenes from postgraduate life. *January*, **61**
Elderly
epilepsy in. *December*, **1069**
shoppers, accidents: correspondence. *November*, **1008**
*Electrolytes in diagnosis of spontaneous intraperitoneal bladder rupture. *November*, **999**
*Enalapril, severe thiazide-induced hyponatraemia during treatment with. *December*, **1105**
Encephalitis, herpes simplex, acyclovir treatment, experience in district hospital. *December*, **1037**
*Endocarditis, *Staphylococcus aureus*, presenting as acute scrotal pain. *July*, **585**
*Endoscopic retrograde cholangiopancreatography in late post-traumatic biliary fistula. *February*, **147**
*Endoscopy, respiratory distress during, unusual case. *September*, **805**
Enzymic immunoassay, novel variant, in measurement of sex hormone binding globulin (abstract). *May*, **411**
Eosinophilia, coagulation abnormalities. *November*, **943**
*Eosinophilic colitis as complication of hypereosinophilic syndrome. *June*, **485**
Epilepsy
in the elderly. *December*, **1069**
* hot-bath, 2 cases. *November*, **975**
thyroid status, patients on anti-convulsants. *October*, **841**
*Epithelioid sarcoma presenting as reflex sympathetic dystrophy syndrome. *March*, **217**
*Epstein's syndrome: case report and survey of literature. *July*, **573**
*Erythema nodosum, granulomatous mastitis as rare cause. *July*, **581**
*Erythroderma, myelodysplasia presenting as. *June*, **481**
Essential hypertension, mild to moderate, nicardipine with nifedipine in treatment. *June*, **463**
Ethnic differences in respiratory diseases. *November*, **937**
Exercise at high altitude
blood lactate changes during. *March*, **177**
effect of carbonic anhydrase inhibitors (abstract). *March*, **193**
Extra-adrenal catecholamine secreting tumours, location, by selective venous sampling and nuclear magnetic resonance scanning. *June*, **451**
Extracorporeal shock wave lithotripsy: review article. *December*, **1025**

Falciparum malaria related hypoglycaemia, a correctable cause of death: correspondence. *January*, **65**
Familial
* dysalbuminaemic hyperthyroxinaemia. *April*, **273**
hypocalciuric hypercalcaemia-familial benign hypercalcaemia: review article. *October*, **835**
Fansidar, treatment for AIDS-related pneumocytosis?: correspondence. *June*, **509**
Fat, changes at high altitude, and effect of acetazolamide (abstract). *March*, **192**
Fatty retroperitoneal tumours – plain film and computed tomographic appearances. *October*, **847**
Fenoterol and salbutamol metered dose aerosols, asthmatic patients, cumulative dose comparison. *June*, **459**
*Fistula, perianal, chronic, beware of rectal duplication. *March*, **213**
*Fistula-in-ano, longstanding, neoplastic transformation. *June*, **503**
Flupirtine and indomethacin, comparison of effect on frusemide-induced diuresis. *November*, **959**
*Folate deficiency and pancytopenia, in alcoholics. *February*, **117**
Frusemide-induced diuresis, comparison of effect of flupirtine and indomethacin. *November*, **959**

*Gall stones (Bouveret syndrome), causing gastric outlet obstruction. *October*, **909**

Gallbladder diseases, pitfalls in ultrasonographic diagnosis: review article. *July*, **525**
Gastric
angiodysplasia, missed cause of gastrointestinal bleeding. *October*, **865**
cancer, following highly selective vagotomy. *January*, **47**
outlet obstruction, due to gall stones (Bouveret syndrome). *October*, **909**
recurrent, due to inguinal hernia. *October*, **905**
Gastritis and gastric campylobacter-like organisms in patients without peptic ulcer. *July*, **543**
Gastroenterology, World Congress, Brazil: conference report. *February*, **151**
Gastrointestinal bleeding, gastric angiodysplasia as missed cause. *October*, **865**
*Gastro-oesophageal reflux in tetraplegia, life-threatening respiratory complication. *May*, **397**
Gating of human central somatosensory pathways (abstract). *June*, **507**
*Gaucher disease, adult, and acute leukaemia. *October*, **899**
General practice, designated trainers. *August*, **711**
*Glomerulonephritis, acute post-streptococcal, followed shortly by acute rheumatic fever. *March*, **209**
*Glucagonoma associated with malakoplakia. *June*, **497**
Glutamate, effects on *in vitro* spinal motoneurones, voltage clamp study (abstract). *October*, **917**
Granulocytic sarcoma, diagnosis to be considered in unusual lymphoma syndromes. *June*, **447**
*Graves' ophthalmopathy
combined irradiation and low-dose cyclophosphamide treatment. *September*, **777**
pathogenesis and treatment: leading article. *September*, **731**
*Greater omentum, lumbosacral plexopathy due to dermoid cyst of. *January*, **45**
Growth hormone responses to hpGRF 1-44 amide, bromocriptine and stress in acromegaly are correlated. *April*, **241**
Guillain-Barré
* neuropathy during treatment with captopril. *March*, **221**
* syndrome associated with herpes zoster. *December*, **1087**
* following acute head trauma. *June*, **479**
* following varicella. *November*, **977**
treatment by modified plasma exchange, cost effective method for developing countries. *December*, **1079**

Haematoma of liver: diagnostic images. *May*, **371**
Haemoglobin level, epidemiology, 1,057 subjects in general practice. *August*, **625**
*Haemolytic-uraemic syndrome, presenting as acute abdomen. *September*, **807**
Haemoptysis with normal chest X-ray, role of bronchoscopy. *November*, **947**
Haemorrhage
* intracranial, 26 year-old woman with idiopathic thrombocytopenic purpura. *September*, **781**
* intraventricular, complicating brain abscess. *September*, **785**
* into a urachal cyst presenting as an 'acute abdomen'. *June*, **493**
*Haemorrhagic endocrine sequelae, with cardiac bypass surgery. *June*, **489**
*Head trauma, acute, Guillain-Barré syndrome following. *June*, **479**
Hemlock water dropwort poisoning: clinical toxicology. *May*, **363**
*Henoch-Schönlein purpura, and recurrent ureteric obstruction. *August*, **699**
Hepatic
* metastasis from intracranial meningioma. *March*, **199**
* tuberculosis, isolated, with scrofuloderma. *May*, **401**
Hepatitis A virus infection, increasing age as important adverse prognostic factor (abstract). *October*, **918**
Hepatitis B, control: conference report. *February*, **151**
*Hereditary spherocytosis, in sisters, unmasked by parvovirus infection. *January*, **49**
*Hernia, Spigelian, strangulated, as emergency. *January*, **51**
Herpes
simplex encephalitis, acyclovir treatment, experience in district hospital. *December*, **1037**
serodiagnosis safety. *November*, **973**
zoster, and Guillain-Barré syndrome. *December*, **1087**
neurological complications. *February*, **85**
High
density lipoprotein, reduced plasma, and increased platelet activity, in arterial versus venous blood. *February*, **91**
fever (gretaer than 39°C) as clinical manifestation of pulmonary embolism. *November*, **951**
* translumbar aortography, chylothorax after. *January*, **37**
Himalayas, BMRES 1984 Medical Research Expedition. *March*, **165**
HLA DR7 DRw12, DIDMOAD syndrome in Chinese male with: correspondence. *December*, **1109**
Hodgkin's disease, cardiac disease following radiation for: correspondence. *August*, **716**
Hospitals in 2000: scenes from postgraduate life. *January*, **61**
*Hot-bath epilepsy, 2 cases. *November*, **975**
Human
immunodeficiency virus (HIV) infection for the general physician: leading article. *June*, **427**
Hydralazine, added to treatment of hypertension uncontrolled by thiazide diuretic plus beta-blocker. *February*, **99**
*Hydrocephalus, normal pressure, presenting as Parkinson's syndrome. *February*, **113**
Hypercalcaemia
disappearing, serum parathyroid hormone concentration. *September*, **741**
due to sarcoidosis: correspondence. *April*, **312**
familial, hypocalciuric-benign: review article. *October*, **835**
incidence and causes. *September*, **745**
* in presentation of 'apathetic' thyrotoxicosis. *April*, **269**
severe, management. *February*, **77**
*Hypereosinophilic syndrome complicated by eosinophilic colitis. *June*, **485**

Hyperexplexia, with clonazepam-induced Tourette syndrome: correspondence. *April*, **311**
Hyperglycaemia
alternate day, caused by alternate day corticosteroid. *September*, **761**
*Hyperlipoproteinaemia, type III Sheehan's syndrome presenting with. *December*, **1099**
*Hypernatraemia due to reset osmostat for vasopressin release and thirst, complicated by nephrogenic diabetes insipidus. *November*, **979**
Hyperparathyroid
* crisis, fatal, presenting with serum calcium level of 7.6 mmol/l. *February*, **111**
* recurrent, 3 cases with evaluation of some pathogenetic and clinical aspects. *March*, **201**
*Hypersensitivity reactions to drugs in AIDS. *January*, **55**
Hypertension
International Society of, 11th Scientific Meeting, Heidelberg (FRG) August 31 to September 6, 1986: conference report. *January*, **63**
uncontrolled by thiazide diuretic plus beta-blocker, effects of adding nifedipine, prazosin, or hydralazine. *February*, **99**
*Hyperthyroidism, paroxysmal kinesigenic choreoathetosis in. *December*, **1089**
*Hyperventilation, and Raynaud's disease. *May*, **377**
*Hypogammaglobulinaemia, late onset, copper deficiency causing macrocytic anaemia. *March*, **205**
Hypoglycaemia, related to falciparum malaria, a correctable cause of death: correspondence. *January*, **65**
and cerebral malaria: correspondence. *August*, **715**
precipitating transient atrial fibrillation, 2 case reports. *October*, **895**
*Hypokalaemia, severe, from kaolin and morphine abuse. *July*, **589**
*Hypomagnesaemia causing myopathy and hypocalcaemia in an alcoholic. *August*, **665**
*Hyponatraemia, thiazide-induced, severe, during treatment with enalapril. *December*, **1105**
*Hypotension, profound, after first dose of ketanserin. *April*, **305**
*Hypothyroidism
acute, myopathy in. *August*, **661**
congenital, from complete iodide transport defect, long-term evolution with iodide treatment. *December*, **1043**
Hypoxia, ventilatory response, how much is good for a mountaineer? *March*, **169**

Ibuprofen in schizophrenia, inducing bilateral ballism: correspondence. *July*, **593**
*Idiopathic thrombocytopenic purpura, intracranial haemorrhage, 26 year-old woman. *September*, **781**
*Ileal carcinoma and tuberculous ileitis. *February*, **145**
*Iliac artery, common, aneurysm, presenting as acute sciatic nerve compression. *October*, **903**
Iloprost infusions in systemic sclerosis. *August*, **617**
*Immunodeficiency, and cryptococcal choroidoretinitis. *November*, **969**
*Immunosuppression, long term, for renal transplant recipient, and intranasal squamous cell carcinoma. *November*, **989**
Indomethacin and flupirtine, comparison of effect on frusemide-induced diuresis. *November*, **959**
*Infarction, spinal venous, causing subacute myelopathy. *August*, **669**
Infective endocarditis, in two district general hospitals, factors influencing mortality. *May*, **345**
